

Mosquito Free®

Mosquito Free® is made with natural ingredients and can be used year round (southern states). Product does not cause discoloration. Mosquito Free® is not a larvicide and is intended to rid adult mosquitoes with proper use. Not for use on edible crops. Visit our website for frequently asked questions at www.gardengirlsrepellents.com.

Concentrate

Directions for 300 Gallon Truck Tank Sprayers which provides saturation application.
1.28oz to make 1 gallon/12.8 oz to make 10 gallons/128oz to make 100 gallons.

Stir product in drum. Fill tank with water then add product. Mix or agitate. We recommend spraying all grassy areas including under shrubs, up to 30ft of wooded areas, wood piles, leafy areas and anywhere on the property where it is shaded and moist. Spray up and under tree leaves. Can also be sprayed directly on swing sets, patios and stone walls. Apply every 21-30 days. Apply as needed for high infestation areas. Contents of drum will make 5,500 gallons of ready to use product and cover approx. 5,500,000 sq.ft.

Do not dilute more than recommended for initial or maintenance applications. You can add more product per gallon for heavily infested areas. This will lower your total gallon production. Allow 1 hour or more of drying time before re-entry. Product works on ticks, spiders, fleas, gnats (including sand gnats). Store in a cool, dry location away from sunlight and heat source. Dispose empty container according to your states requirements for non-hazardous material. Avoid spraying in temperatures that exceed 95 degrees. Do not spray around active beehives. Product is hazardous to aquatic life. Do not spray into any body of water. We do not recommend mixing any other product with Mosquito Free.

Directions for mixing for back pack and mist blowers providing mist applications.
2.5oz per gallon/7.5oz per 3 gallon back pack sprayer.

This product is not registered with US EPA. Garden Girls Repellents™ LLC represents that this product qualifies for 25(b) exemption under the FIFRA.
